

The background of the image is a blurred, horizontal gradient. The top portion is a deep, dark blue, which transitions through a purple and violet hue to a bright, warm orange at the bottom. The overall effect is that of a fast-moving landscape or sky, captured with motion blur.

The story of the eagle...

It can live up to 70 years

**But to reach this age, the eagle must
make a hard decision**

In its 40's

A bald eagle is shown in flight against a clear blue sky. The eagle's wings are spread wide, and its head is turned to the right. The eagle's body is dark brown, and its head is white with a yellow beak. The background is a solid, light blue color.

Its' long and flexible talons can no longer grab prey which serves as food

Its' long and sharp beak becomes bent

Its' old-aged and heavy wings, due to their thick feathers, become stuck to its' chest and make it difficult to fly

Then, the eagle is left with only two options:
die or go through a painful process of change
which lasts **150 days**.

The process requires that the eagle fly to a mountain top and sit on its' nest

**There the eagle knocks its' beak
against a rock until it plucks it out**

After plucking it out, the eagle will wait for a new beak to grow back and then it will pluck out its' talons

When its' new talons grow back, the eagle starts plucking its' old-aged feathers

And after **five months**, the eagle takes its' famous flight of rebirth and lives for

...

30 more years

Why is change needed?

Many times, in order to survive we have to start a change process.

We sometimes need to get rid of old memories, habits and other past traditions.

Only freed from past burdens, can we take advantage of the present

Our lives are not determined by what happens to us but by how we react to what happens, Not by what life brings to us, but by the attitude we bring to life. A positive attitude causes a chain reaction of positive thoughts, events, and outcomes.

It is a catalyst, a spark that creates extraordinary results.

When it rains, most birds head for shelter; the eagle is the only bird that, in order to avoid the rain, starts flying above the cloud.....

Isaiah 40:31

***But those who hope in the LORD
will renew their strength.
They will soar on wings like eagles;
they will run and not grow weary,
they will walk and not be faint.***
